

System One REMstar SE

Extending the proven System One family gives providers what they need

Designed around your needs

Philips Respironics took input from home care providers and developed a device to meet the demands of an evolving sleep industry. As an extension of the proven System One family, the new REMstar SE rounds out the System One line by providing a robust set of features in one affordable unit. Now, all of your patients can enjoy many of the same comfort benefits, including:

- Flex pressure relief
- Enhanced humidification with heated tube option
- Modem and SD card capable

Simplicity at its best

System One REMstar SE offers users simplicity and ease of use through its intuitive, icon-based interface. Philips provides cost savings to home care providers by offering one family of devices with common components such as filters, tubing, humidifiers and more.

PHILIPS

RESPIRONICS

sense and simplicity

Flexing its therapy muscles

Philips Respironics Flex technology has become our clear standard for pressure relief therapy.

A more natural way of breathing

Flex technology helps make PAP therapy more natural by sensing when the patient is exhaling and reducing pressure at those times to make breathing more natural and comfortable. REMstar SE is covered under our Flex Promise Program. If a patient is non-compliant on Flex, we will credit the home care provider 100% of the purchase price toward the purchase of a bi-level OSA device.
